The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,3,4,10,11,18 and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cross 169,962. See Figure 1. Note spacers D.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cross.

The shape of the rod end is considered to have been a design choice obvious for one having ordinary skill in the art at the time of the invention. Regarding claim 19, duplication of parts is a matter of choice obvious for one having ordinary skill in the art at the time of the invention.

Claims 6,7,8,9,12,13,14,15,16,17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar receptacle racks are illustrated by Anton 1,804,912; Dinkel 2,136,843; Bergman 2,524,877; Press D166,410; Haber 4,823,966.
